Why Choose GWA over other Sage Accpac, BusinessVision and CRM Consultants:

- ▶ Longevity — over 28 years and counting.
- ▶ Trustworthiness — you can trust us — don't believe us, talk to some of our clients.
- ▶ Ability — GWA is a large enough organization to understand simple or complex situations while small enough to react quickly.
- ▶ Performance— our consultants are very professional but fun. This is serious business we are involved in, but it needs to be enjoyable.
- ▶ Experience — some of our consultants have over 30 years experience working with the computer industry and this makes for some amazing experiences.
- ▶ Believable — we practice what we preach. We use the software that we support as it applies to our business. We use the CRM with the Accpac for example to enable us to see the value your clients will experience.

This is how we will work together :

- ▶ For over 28 years, we have followed our five steps for success.
- ▶ Set up an implementation meeting and speak with one of our professionals – he/she will help you with your plan.
- ▶ Next, we need to create a blueprint of objectives and timeframe for your company's overall requirements, including data conversion requirements and form/report modifications.
- ▶ Once we have an overview, we identify the needs of your company in respect to existing in-house hardware and a staff training assessment. Without proper training, new technology can be non productive.
- ▶ Then, put the new software and/or hardware in place, and train your staff on the equipment and software.
- ▶ Ongoing support and evaluation of your systems must be performed in order to ensure that all is functioning properly.
