GWA Among Top Sage BusinessVision Resellers in 2010

Toronto-area technology consultant and Sage business partner earns award recognizing top sales performance as a Sage BusinessVision reseller in 2010.

Toronto, Canada – November 18, 2010 – GWA Business Solutions, Inc., a Sage reseller and technology services provider based in Toronto, has been named a Top Sales Performer for 2010 at the annual Sage BusinessVision Integration Partners (BViP) conference this past October. The award is presented to resellers of Sage BusinessVision Accounting who have achieved noteworthy success implementing Sage BusinessVision, accounting software designed for small business. With offices in Toronto, Fort Lauderdale, and the Cayman Islands, the firm also provides Sage Accpac and Sage CRM to businesses throughout the Southeast United States, Canada, and the Caribbean.

According to GWA Business Solutions (www.GWAbiz.com) founder and President Gail Wilson, achieving award-winning success was simply a matter of matching the right product with client needs. "Naturally, we're honored to be recognized by Sage with such a distinguished award. But for GWA, the success we've had with Sage BusinessVision Accounting is simply a part of our commitment to providing clients with solutions that fit. In a tough economy, Sage BusinessVision offers a step up from off-the-shelf software like QuickBooks and Simply Accounting, without the price tag of sophisticated enterprise-level software."

Designed to fill the gap between entry-level and complex high-end systems, Sage BusinessVision Accounting (<http://www.gwabiz.com/gwa-drupal/node/22>) is packed with innovative features, productivity-enhancing benefits, and a range of customization options. With up to 18 fully integrated modules including General Ledger, Accounts Receivable, Accounts Payable, Point of Sale, and Payroll, small businesses enjoy all the benefits of custom-written business management and accounting software, without the high custom price tag.

Wilson goes on to explain how full-featured accounting software in an easy to implement application is a significant part of the product's widespread success. "Sage BusinessVision provides powerful features for accounting and inventory management right out of the box. Plus, there are more than 100 third-party applications and add-on feature packs designed for specific business needs and industry requirements. Our customers are always amazed at what they can accomplish at a price that doesn't break the bank. So ultimately, the award recognizes our ability to tackle the challenges our customers are facing while helping to maximize their investments in technology."
